

@haikupedias/poetry/lexicon

Word datasets for the Haikupedias project.

Contents

This library provides two curated word sets for composing haikupedias:

Word Set A — Contemplative & Natural

- **Theme:** Nature, contemplation, quiet moments
- **Mood:** Meditative, peaceful, introspective
- **Count:** 90 words
- **Distribution:**
 - 24 nouns (12 major, 12 minor)
 - 24 adjectives (12 major, 12 minor)
 - 24 verbs (12 major, 12 minor)
 - 12 adverbs (6 major, 6 minor)

Word Set B — Dynamic & Urban

- **Theme:** Movement, energy, contemporary life
- **Mood:** Energetic, intense, urban
- **Count:** 90 words
- **Distribution:** Same as Set A

Usage

```
import { WORD_SET_A, WORD_SET_B, Word } from "@haikupedias/poetry/lexicon";

// Access all words from Set A
const wordsA: Word[] = WORD_SET_A;

// Filter by type
const nouns = WORD_SET_A.filter((w) => w.type === "noun");
const verbs = WORD_SET_A.filter((w) => w.type === "verb");

// Filter by tonality
const majorWords = WORD_SET_A.filter((w) => w.tonalityGroup === "major");
const minorWords = WORD_SET_A.filter((w) => w.tonalityGroup === "minor");
```

Word Structure

Each word object contains:

- **id:** Unique identifier (e.g., "a-n-01")

- **label**: The word text
- **type**: Grammatical category (noun, verb, adjective, adverb)
- **tonalityGroup**: Musical mapping (major, minor)

Tonality Assignment

Words are assigned to major or minor groups based on their emotional quality:

- **Major**: Bright, uplifting, open feelings
- **Minor**: Contemplative, melancholic, introspective feelings

This mapping drives the musical composition algorithm.

No Angular Dependencies

This is a pure data library with no framework dependencies.
